
A. SPECIFIC CONDITIONS:**I. Construction Phase****i. COMPLIANCE CONDITIONS:**

Vehicles hired for construction activities should be operated only during non-peak hours.

COMPLIANCE STATUS

During Construction the instruction was given to adhere to the conditions regarding operation of vehicles in non peak hours.

ii. COMPLIANCE CONDITIONS:

All the top soil excavated during construction activities should be stored for use in horticulture/landscape developments within the project site.

COMPLIANCE STATUS:

During construction activities there will be excavated soil which will be stored for use in horticulture/landscape developments within the project site.

iii. COMPLIANCE CONDITIONS:

Ready mixed concrete shall be used in building construction.

COMPLIANCE STATUS:

Ready mix concrete will be used for the construction.

iv. COMPLIANCE CONDITIONS:

Water demand during construction shall be reduced by use of premixed concrete, curing agents and other best practices.

COMPLIANCE STATUS:

Water usage in construction activities will be optimized to avoid the misuse. All members are given the instruction to comply the condition. This will be possible as every member will use premix concrete.

v. **COMPLIANCE CONDITIONS:**

Permission to draw and use ground water for construction work shall be obtained from competent authority prior to construction/operation of the project.

COMPLIANCE STATUS:

Permission for ground water withdrawal for Construction and operation is being obtained from the state Ground water Authority.

vi. **COMPLIANCE CONDITIONS:**

Fixtures for showers, toilet, flushing and drinking should be of low flow either by use of aerators or pressure reducing devices or sensor based control.

COMPLIANCE STATUS:

To minimize the water usage necessary measures are taken to use low flow water flushing gadgets.

vii. **COMPLIANCE CONDITIONS:**

Use of glass may be reduced upto 40% to reduce the electricity consumption and load on air conditioning. If necessary, use high quality double glass with special reflective coating in windows.

COMPLIANCE STATUS:

For reducing electricity consumption different measures like use of Glass and 5 star rated gadgets will be used in the operation of the units.

viii. **COMPLIANCE CONDITIONS:**

Roof should meet the prescriptive requirement as per energy conservation building code by using appropriate thermal insulation material to fulfill requirement.

COMPLIANCE STATUS:

As per building rules the roof will be made having appropriate thermal insulation.

ix. **COMPLIANCE CONDITIONS:**

Opaque wall should meet prescriptive requirement as per energy conservation building code which is proposed to be mandatory for all air conditioned spaces while it is aspirational for non air conditioned spaces by use of appropriate thermal insulation to fulfill requirement.

COMPLIANCE STATUS:

The appropriate measures will be taken like opaque walls etc. for energy conservation as per building code.

.

x. **COMPLIANCE CONDITIONS:**

Storm water control and its reuse should be as per Central Ground Water Board and BIS standards for various applications.

COMPLIANCE STATUS:

Storm water will be reused as far as possible through the rain water harvesting system and as per the guidelines Central Ground Water Board and BIS standards.

xi. **COMPLIANCE CONDITIONS:**

All required sanitary and hygienic measures including portable toilets/septic tank etc. for labour should be in place before starting construction activities and to be maintained throughout the construction phase.

COMPLIANCE STATUS:

All required sanitary and hygienic measures including portable toilets/septic tank etc. for labour are given during construction activities.

xii. **COMPLIANCE CONDITIONS:**

The possibility of providing housing for labourers/workers shall be examined in consultation with concerned authorities to avoid creation of slums near the foundry park. The project proponent shall submit a report on this subject to MoEF within Six months.

COMPLIANCE STATUS:

There will be strict vigil, so that no labour complex is set up near the project site.

xiii. **COMPLIANCE CONDITIONS:**

Soil and ground water samples will be tested to ascertain that there is no threat to groundwater quality by leaching of heavy metals and other toxic contaminants.

COMPLIANCE STATUS:

The testing of soil & ground water is done.

xiv. COMPLIANCE CONDITIONS:

A First Aid Room will be provided at the project site both during construction and operation of the project.

COMPLIANCE STATUS:

For the cluster as a whole a First Aid Counter & Health Care Centre will be set up.

xv. COMPLIANCE CONDITIONS:

Adequate drinking water facility should be provided for construction workers at the site. The safe disposal of wastewater and solid wastes generated during the construction phase should be ensured.

COMPLIANCE STATUS:

Plan for providing drinking water for construction worker was in place and it will be provided as & when necessary during construction. During construction the generated solid waste is being disposed.

xvi. COMPLIANCE CONDITIONS:

Disposal of muck including excavated material during construction phase should not create any adverse effects on the neighbouring communities and be disposed off taking the necessary precautions for general safety and health aspects of people.

COMPLIANCE STATUS:

Disposal of muck including excavated material during construction phase is planned in such a way so that it could not affect the

surrounding environment. Necessary precautions for general safety and health aspects of people is being taken care of.

xvii. **COMPLIANCE CONDITIONS:**

Diesel power generating sets used during construction phase should be of “enclosed type” to prevent noise and should conform to rules made under Environment (protection)Act 1986, prescribed for air and noise emission standards.

COMPLIANCE STATUS:

During construction if D.G. is used then the proponent will comply the relevant rules for running the sets as per Environment (Protection) Act 1986.

xviii. **COMPLIANCE CONDITIONS:**

Ambient noise level should conform to standards both during day and night when measured at boundary wall of the premises/SEZ. Incremental pollution loads on the ambient air and noise quality should be closely monitored during construction phase.

COMPLIANCE STATUS:

The project proponent will conform to standards of Noise level at day & night time as per Environment Act. The present Noise Level is given in **Annexure- I**

xix. **COMPLIANCE CONDITIONS:**

The construction agencies shall use fly ash based material/products as per the provisions of fly ash notification of 14.9.1999 and as amended on 27.08.2003.

COMPLIANCE STATUS:

The land filling is already done by fly ash as per conditions during construction phases. The construction agencies will follow the rules as per the provisions of fly ash notification of 14.9.1999 and as amended on 27.08.2003.

xx. COMPLIANCE CONDITIONS:

Vehicles hired for bringing construction material at site should be in good condition and should have valid "pollution under check" (PUC) certificate and to conform to applicable air and noise emission standards and should be operated only during non-peaking hours.

COMPLIANCE STATUS:

There is a cell to check the validity of pollution check of all vehicles during construction phase. The checking was done regularly. During operation also the checking of vehicles from compliance of pollution norms will be done.

xxi. COMPLIANCE CONDITIONS:

Construction spoils including bituminous materials and other hazardous materials must not be allowed to contaminate water courses and the dump sites for such material must be secured so that they should not leach into the ground water.

COMPLIANCE STATUS:

The storage of construction spoils, bituminous materials & other hazardous materials will be done in such a way so that no leaching to ground can take place.

xxii. COMPLIANCE CONDITIONS:

Any hazardous waste generated during construction phase should be disposed off as per applicable Rules & norms with necessary approvals of the State Pollution control Board.

COMPLIANCE STATUS:

There will be no hazardous waste in this project during construction phase. If it is generated then the waste will be disposed off as per applicable rules & norms with prior approval of WBPCB.

xxiii. COMPLIANCE CONDITIONS:

The diesel required for operating DG Set shall be stored in underground tanks and if required clearance from the Chief Controller of Explosives shall be taken.

COMPLIANCE STATUS:

The diesel for D.G. Set if needed then a prior storage arrangement will be placed prior to operation.

xxiv. COMPLIANCE CONDITIONS:

The approval of competent authority shall be obtained for structural safety of the buildings due to any possible earthquake, adequacy of fire fighting equipments etc. as per National Building Code including protection measures from lightening etc.

COMPLIANCE STATUS:

The approval regarding structural stability of the building shed etc. will be taken from the competent authority as per National Building Code. The protection measures from lightening etc will be taken.

xxv. COMPLIANCE CONDITIONS:

The width of the road around the park shall be a minimum of 3.0 meters instead of 1.5 m, as proposed.

COMPLIANCE STATUS:

The width of the road around the park is already designed to keep it at a minimum of 3.0 meters.

xxvi. COMPLIANCE CONDITIONS:

Under the provisions of the Environment (Protection) Act 1986, legal action shall be initiated against the project proponent if it was found that construction of the project had started without obtaining environmental clearance.

COMPLIANCE STATUS:

The proponent has intimated all stake holders that they can start the work of construction after obtaining environmental clearance.

xxvii. COMPLIANCE CONDITIONS:

Regular supervision of the above and other measures for monitoring should be in place all through the construction phase so as to avoid disturbance to the surroundings.

COMPLIANCE STATUS:

Regular Supervision of compliance of the conditions & implementation of other measures is maintained during construction phase as per provisions of the E.C. once in six months. Ambient Air Quality monitoring is done once in six months and enclosed herewith as **Annexure- II**.

II. Operation Phase

i. **COMPLIANCE CONDITIONS:**

Grouping/zoning of the plots/units should be in such a way that the waste from one unit may be possible to be used as a raw material in another unit.

COMPLIANCE STATUS:

It will be complied when the units will be in operation phase.

ii. **COMPLIANCE CONDITIONS:**

Emissions from blast furnaces/cupola furnaces/electrical furnaces/Inductive furnaces will meet the prescribed standards.

COMPLIANCE STATUS:

When all the units will start operation necessary instruction will be given to all units for maintaining the standards for emissions from Blast Furnace/Cupola/Induction Furnaces etc.

iii. **COMPLIANCE CONDITIONS:**

No coke oven plant will be setup within SEZ.

COMPLIANCE STATUS:

No Coke Oven Plant will be allowed in the park.

iv. **COMPLIANCE CONDITIONS:**

Iron Slag will be properly managed and efforts will be made to utilize the same in cement, road construction, landfill etc.

COMPLIANCE STATUS:

During operational phase Iron Slag will be properly managed and efforts will be made to utilize in downstream industry.

v. **COMPLIANCE CONDITIONS:**

Liquid effluent emanating from different units will be treated to conform to the prescribed standards.

COMPLIANCE STATUS:

There will be treatment facilities for the waste water if generated from different units during operation phase.

vi. **COMPLIANCE CONDITIONS:**

Adequate measures will be taken to control fugitive dust emission from the foundries in SEZ.

COMPLIANCE STATUS:

Every unit will implement the measures for control of fugitive dust emission from the foundries in the park during operation.

vii. **COMPLIANCE CONDITIONS:**

Diesel power generating sets proposed as source of backup power for lifts and common area illumination should be of “enclosed type” and conform to rules made under the Environment (Protection) Act 1986. The location of DG Set may be decided in consultation with State Pollution Control Board.

COMPLIANCE STATUS:

Every unit will install backup power source for lift and common area. The location of D.G. set will be decided in consultation with SPCB.

viii. **COMPLIANCE CONDITIONS:**

During night time the noise levels measured at the boundary of the building/SEZ shall be restricted to the permissible levels to comply with the prevalent regulations.

COMPLIANCE STATUS:

The Noise levels will be restricted to within limits of WBPCB during operational phase.

ix. **COMPLIANCE CONDITIONS:**

Noise should be controlled to ensure that it does not exceed the prescribed standards.

COMPLIANCE STATUS:

Noise control system will be implemented to prevent higher noise level exceeding the prescribed standards.

x. **COMPLIANCE CONDITIONS:**

Weep holes in the compound walls shall be provided to ensure natural drainage of rainwater in the catchment area during the monsoon period.

COMPLIANCE STATUS:

It will be complied.

xi. **COMPLIANCE CONDITIONS:**

The STP/CETP shall be installed for the treatment of sewage/trade effluent generated to the prescribed standards including odour. Treated waste water shall be used for flushing of toilets, etc. In case treated effluent is to be discharged separately during monsoon period consent of State Pollution Control Board shall be taken.

COMPLIANCE STATUS:

There will be STP/CETP as per requirement when all the units will start functioning if required.

xii. COMPLIANCE CONDITIONS:

Separation of gray and black water should be done by the use of dual plumbing line. Treatment of 100% gray water by decentralized treatment should be done.

COMPLIANCE STATUS:

It will be looked into if there is a need for separation of gray & black water.

xiii. COMPLIANCE CONDITIONS:

For disinfection of wastewater ultra violet radiation shall be used in place of chlorination.

COMPLIANCE STATUS:

For disinfection of waste water UV will be used in place of chlorination.

xiv. COMPLIANCE CONDITIONS:

Rainwater harvesting and ground water recharging shall be practiced. Oil & Grease trap shall be provided to remove oil and grease from the surface run off and suspended matter shall be removed in a settling tank before its utilization for rainwater harvesting.

COMPLIANCE STATUS:

The project will have efficient rainwater harvesting and ground water recharging along with oil & grease trap for removal of oil & grease from the surface run off and suspended matter.

xv. COMPLIANCE CONDITIONS:

The solid waste generated should be properly collected & segregated. The project proponent shall consider generation of biogas from biodegradable component of solid wastes. The final view/proposal in this regard shall be submitted to MoEF within two months.

COMPLIANCE STATUS:

The feasibility will be explored & if found feasible, then a proposal will be sent to MoEF.

xvi. COMPLIANCE CONDITIONS:

Disposal of debris and sludge etc. shall be planned on long-term basis. Their use of road construction work is a short-term proposal. Details in this regard shall be submitted to MoEF within two months.

COMPLIANCE STATUS:

Disposal of debris and sludge will be done in a planned manner. Construction debris will be used for road making.

xvii. COMPLIANCE CONDITIONS:

The open spaces inside the plot should be preferably landscaped and covered with vegetation of indigenous variety. Green belt of adequate width and density will be provided all around the periphery of the SEZ preferably with local species to reduce noise and dust level.

COMPLIANCE STATUS:

The cluster area will have decent landscape & vegetation. Green belt plan will be implemented.

xviii. COMPLIANCE CONDITIONS:

The ground water levels and its quality should be monitored regularly in consultation with Central Ground Water Authority. Permission shall be obtained from Central Ground Water Authority for drawing ground water.

COMPLIANCE STATUS:

There will be checking system on regular basis for the ground water quality. Permission will be taken from the authority as per requirement for withdrawal of water.

xix. COMPLIANCE CONDITIONS:

A report on the energy conservation measures should be prepared incorporating details about building materials & technology. R & U Factors etc and submitted to the Ministry in three months time.

COMPLIANCE STATUS:

After operation starts in different units a report on the energy conservation measures will be prepared & submitted to the ministry in three months time.

xx. COMPLIANCE CONDITIONS:

The values of R & U for the building envelope should meet the requirements of the hot & humid climatic location. Details of the building envelope should be worked out and furnished in three months time.

COMPLIANCE STATUS:

It will be complied.

xxi. COMPLIANCE CONDITIONS:

Energy conservation measures like installation of CFLs/FLs for lighting the areas outside the building should be integral part of the project design and should be in place before project commissioning. Used CFLs & FLs should be properly collected and disposed of/sent for recycling as per the prevailing rules/guidelines/standards issued by the regulatory authority to avoid Mercury contamination. Use of solar panels may be done to the extent possible.

COMPLIANCE STATUS:

It will be complied.

xxii. COMPLIANCE CONDITIONS:

The buildings should have adequate distance between them to allow movement of fresh air and passage of light to the premises.

COMPLIANCE STATUS:

There will be enough space between buildings in the project site.

xxiii. COMPLIANCE CONDITIONS:

Adequate measures should be taken to prevent odour problem from solid waste processing plant as also from STP/CETP.

COMPLIANCE STATUS:

Adequate measures will be taken to prevent odour problem where ever it will be needed.

xxiv. COMPLIANCE CONDITIONS:

Sufficient provision will be made for parking of trucks for handling raw materials, finished products and waste materials. Details in this regard shall be submitted to MoEF within two months.

COMPLIANCE STATUS:

During operation all trucks will be kept at an earmarked parking lot before unloading of raw materials in different units.

B. GENERAL CONDITIONS**1. COMPLIANCE CONDITIONS:**

The environmental safeguards contained in the documents should be implemented in letter and spirit.

COMPLIANCE STATUS:

It will be done.

2. COMPLIANCE CONDITIONS:

Provision should be made for the supply of kerosene or cooking gas and pressure cooker to the laborers during construction phase.

COMPLIANCE STATUS:

It is being provided during land filling & same will be done during construction of individual units.

3. COMPLIANCE CONDITIONS:

6 monthly monitoring reports should be submitted to the Ministry and its Regional Office.

COMPLIANCE STATUS:

It is complied on regular basis for last few years.

4. COMPLIANCE CONDITIONS:

Officials from the Regional Office of MoEF, Bhubneshwar who would be monitoring the implementation of environmental safeguards should be given full cooperation, facilities and document/data by the project proponents during their inspection. A complete set of all the documents submitted to MoEF should be forwarded to the CCF, Regional office of MoEF, Bhubaneshwar.

COMPLIANCE STATUS:

For the last few years, the compliance reports are sent to the regional office of MoEF at Bhubaneshwar on regular basis.

5. COMPLIANCE CONDITIONS:

In the case of any change(s) in the scope of the project, the project would require a fresh appraisal by this Ministry.

COMPLIANCE STATUS:

It will be complied if any change in the scope of the project takes place.

6. COMPLIANCE CONDITIONS:

The Ministry reserves the right to modify/add additional environmental safeguards subsequently, if found necessary. Environment Clearance granted will be revoked if it is found that false information has been given for approval of the project.

COMPLIANCE STATUS:

Nothing will be done beyond the conditions imposed by MoEF.

7. COMPLIANCE CONDITIONS:

Necessary permission shall be obtained from the State Fire Department for providing fire safety measures before allotment of premises. If any forest land is involved in the proposed site, clearance under the Forest Conservation Act, 1980 from the Competent Authority shall be taken.

COMPLIANCE STATUS:

It will be complied.

8. COMPLIANCE CONDITIONS:

These stipulations would be enforced among others under the provisions of the Water (Prevention and Control of Pollution) Act, 1974 the Air (Prevention and control of Pollution) act 1981, the Environment (Protection) Act, 1986 and the Public Liability (Insurance) Act, 1991.

COMPLIANCE STATUS:

It is accepted & to be complied.

9. COMPLIANCE CONDITIONS:

The project proponent shall enter in to MOU with all buyers of the property to ensure operation and maintenance of the STP/CETP and other assets of the SEZ.

COMPLIANCE STATUS:

The MOU will be made between all the buyers of the plot in this cluster to ensure smooth operation & maintenance of the STP/CETP as applicable inside this cluster.

10. COMPLIANCE CONDITIONS:

Any appeal against this environmental clearance shall lie with the National Environment Appellate Authority. If preferred within a period of 30 days as prescribed under section 11 of the National Environmental Appellate Act, 1997.

COMPLIANCE STATUS:

It is agreed and necessary steps can be taken by MoEF as & when required.
